ABOUT THE COMPANY

A class I general contracting company, CONSTEC Construction and Design S.A.E. is an Egyptian joint stock company that has been providing integrated building solutions since 1989. Our expert team handles various projects, including industrial, commercial, and residential construction and design, infrastructure and water treatment, tourist attractions, and completing any and all administrative tasks. We pride ourselves on over two decades of serving an extensive list of clients, whose trust we have worked hard to earn. Our work ethic focuses on a strong commitment to quality and customer satisfaction.

We develop marketing strategies and pricing techniques then implement these plans to ensure that all involved parties benefit in each project CONSTEC takes on. Nonetheless, we recognize the role teamwork plays in each and the value of collaborating with property owners, consultants, subcontractors, vendors, and technical and administrative staff. CONSTEC consistently uses all of its resources, expertise, and managerial skills to achieve the defined goals of each project. CONSTEC constantly recruits choice individuals who are highly skilled professionals to become staff members. These professionals are trained through our rigorous training programs and come to master various specialized software programs that enable them to manage any stage in the project cycle.

PARTNERS IN SUCCESS

SODIC

CONSTEC's work with SODIC expanded from a volume of 30 MEGP (SODIC spine) to 300 MEGP, meeting and exceeding their requirements with adherence to the highest quality.

Back to back deliveries of units to SODIC's clients was made possible due to our delivery of their projects ahead of schedule.

JUSHI GROUP

CONSTEC was one of the first companies to execute large projects in the Chinese industrial zone "TEDA" located at Ain Sokhna. The agreement and contract were signed in China after a meeting with Jushi's high board. We executed water tanks and factories (F2,F3,F5), including the provision of all of the engineering studies to ease their implementation. We have also provided back to back support to JUSHI and their engineering consultant, along with valuable engineering solutions and improved execution plans for several work packages and project tasks. Moving with resilience through all of the projects' challenges, including but not limited to coordinating between multiple work packages (Local and/or Chinese), our engineering team was able to execute a complex concrete structure with an intricate level of details, as well as coordinate composite sections and concrete completion on time to enable erection of steel structure, high quality end finishes. Not only was the project completed as per schedule and within the allocated budget - there were also cuts to the costs, and thus, savings for the owner. This was made possible by the introduced value engineering solutions and our continuous support of the resident engineering team (We even rented an office at their premises - in the hotel - to constantly be in reach).
